[Important information for Medibank Private members](#)

By [Dr David Moore](#), 22 August 2015

Medibank Private is taking action to increase shareholder profits by drastically limiting the value of their insurance products touted at improving healthcare outcomes but, in truth, are without any evidence basis and are completely unworkable. Medibank members are at risk of finding themselves completely without insurance coverage, at no fault of their own, their situation is the thin end of a tactical wedge being aimed between patients and their healthcare choices; the endpoint would likely be a Healthcare system, where insurers dictate from which doctors and hospitals patients may receive care, as determined by the insurers.

Read what the Australian Private Hospitals Association has to say about the move [here](#). *Remember, all Australians are without penalty.*
